## Hello

I present to you the Chi Nei Tsang Branch which is part of the System of Universal Healing Tao, a system of millennial Taoist practices that have been brought together, structured and modularized as an Energy University. The student can thus evolve step by step, module by module, from the basic practices to the highest spiritual practices to develop their soul and elevate their spirit.

**Chi Nei Tsang** is part of the Branch of Taoist Healing Arts along with Cosmic Healing. It integrates completely into the UHT System and it goes hand in hand with the practices of the Basic Module . At the beginning of each Chi Nei Tsang session I will show you the practices of the Inner Smile and the Six Healing Sounds. During the session I will also explain how to massage yourself.

**The goal of Chi Nei Tsang** is to give you tools to maintain the effects of the session and to allow you to reconnect with your self-healing power. Encourage yourself, with these simple techniques, to take responsibility for your health and set up a new lifestyle to avoid recreating the same symptoms and to be able to experience the everyday living in flow and joy (flowjoy<sup>©</sup>).
